About me

I am an aspiring full stack developer, with experience in front-end development using HTML5, CSS3, JavaScript, ReactJS, Bootstrap, Material UI, and Styled Components, currently studying Gatsby, Nodejs, Express and MongoDB. I am a lifelong learner with satisfaction I get from solving and overcoming challenges. I am always looking for ways to improve my skills and qualifications so I can work to the highest standard possible in my role.

Technical Skills

HTML5 | CSS3 | JavaScript | React | Material UI | Styled Components | Contentful CMS | Restful API's

Tools

GitHub | VS Code

Projects

Credit Score Check - link (<https://willtech-check-credit.netlify.app/>)

- This is a credit score check app that I designed using dummy data.
- To sign in, the user has to enter a valid South African ID number.
- The data used is the dummy data manipulated using the user's last name.

Auto-Setters Dealership - link (<https://auto-setters.netlify.app/>)

- Customers can filter using car prices, data is fetched using Contentful CMS.
- Customers can filter/select car brand of their choice.
- Customers can select the year or model of the car based on their choice.

Crypto-Markets - link (<https://crypto-markets-willtech.netlify.app/>)

- First 100 list of crypto currencies, user is able to search for a coin they want to see.
- User can select whether they want to view prices in ZAR or USD. Used CoinGecko API.
- User can select and see how the individual coin has been performing.
